Health Research Group, Center for Policy Studies, Central European University

**THE INSTITUTIONAL DESIGN OF DECISION-MAKING PROCESSES IN HEALTH CARE PRIORITY SETTING**

**March 1<sup>st</sup>, 2016 15.30-17.30**

**Corvinus University of Budapest, Budapest, Közraktár utca 4-6/Fővám tér. Room C VII**

Every year, thousands of new medicines and other new treatments enter the health care market. Public health care systems cannot finance them all. Most OECD-countries have for this reason established specialized bodies that take decisions about which technologies to include into the public benefit package and which not. The institutional design of these bodies varies considerably. I will present a framework that seeks to grasp the empirical variety and complexity of these decision-making processes and bodies. Next to giving some examples, I will discuss the motives of governments to delegate these decisions to non-majoritarian bodies and consider the distributive effects different institutional design choices may have.

**Program**

**Chair: Petra Baji**, Department of Health Economics, Corvinus University of Budapest

**15.30** Opening

**Petra Baji**, Corvinus University of Budapest

**Olga Loblova**, Health Research Group, Center for Policy Studies, Central European University

**15.40** The institutional design of decision-making processes in health care priority setting

**Katharina Böhm**, Ruhr-University Bochum, Germany

**16:40** Discussion

**17:25** Take home message & Closing
